■ ABOUT TEAMBEEES

A workforce and platform partner built around domains

ServiceNow among them

TALENT & TECHNOLOGY ENABLEMENT PARTNER

We help global enterprises build, expand and transform technology and engineering capabilities.

CLIENT OUTCOME

Build sustainable technology and engineering capability while maintaining delivery quality, speed and workforce flexibility.

2021

Established

50+

TA and domain experts

20+

Enterprise customers

4

Markets

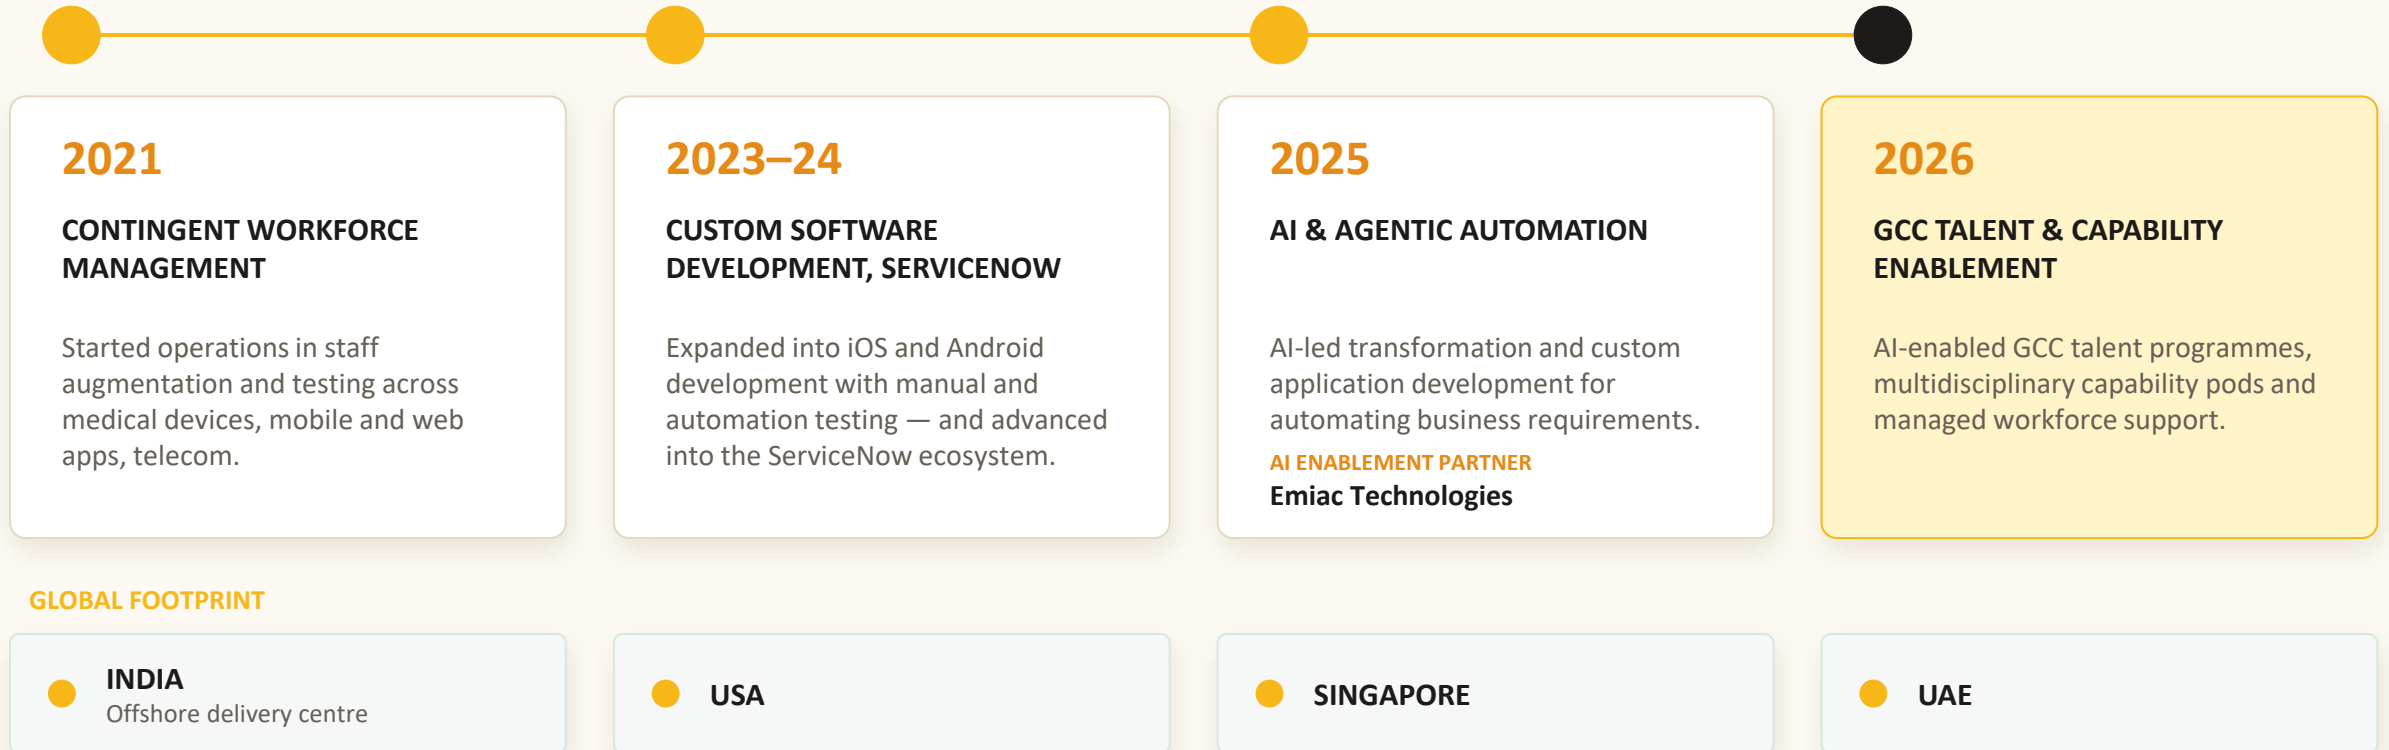

24/7

Global delivery coverage

Enterprise platforms and engineering under one roof — most ServiceNow partners do one or the other.

■ TEAMBEEES JOURNEY & GLOBAL PRESENCE

From contingent workforce management to an AI-enabled practice

■ CLIENT PORTFOLIO

Trusted across enterprise technology environments

Enterprise and product organisations that trust us with their platform and talent work.

ENTERPRISE ENGAGEMENTS • DOMAIN-ALIGNED TALENT • FLEXIBLE WORKFORCE MODELS

■ OUR SERVICES OVERVIEW

ServiceNow sits inside a broader enterprise platform and workforce practice

01

ENTERPRISE SOLUTIONS

- **ServiceNow**
- SAP
- Salesforce
- Enterprise integrations
- Platform support and AMS

02

AI-ENABLED HIRING & WORKFORCE

- Contract staffing
- Staff augmentation
- Permanent hiring
- Managed workforce support
- Domain-led assessment

03

DIGITAL PRODUCT ENGINEERING, DATA & AI

- Product engineering
- AI and agentic automation
- Data engineering and analytics
- Cloud-native development
- Quality engineering

04

GCC BUILD & SCALE

- Capability and workforce planning
- Core-team and specialist hiring
- Managed capability pods
- Workforce operations and governance
- Scale-up and transition support

ServiceNow first in this deck — the rest is available to the same clients under one relationship.

■ CAPABILITIES ACROSS THE ECOSYSTEM

Scalable, innovative and tailored ServiceNow solutions

Delivered by certified ServiceNow experts.

ITSM

IT SERVICE MANAGEMENT

Streamlined IT services for operational excellence

ITOM

IT OPERATIONS MANAGEMENT

Real-time visibility, automation and infrastructure control

CSM

CUSTOMER SERVICE MGMT.

Elevated, connected customer service experiences

HRSD

HR SERVICE DELIVERY

Modern, efficient employee HR services

ITAM

IT ASSET MANAGEMENT

Optimized hardware and software asset investments

IRM

INTEGRATED RISK MGMT.

Proactive risk identification and mitigation

SecOps

SECURITY OPERATIONS

Strengthened enterprise cybersecurity response

ESG

ENVIRONMENTAL, SOCIAL & GOV.

Technology that supports sustainability goals

Certified across the workflow, operations, risk and sustainability suites.

■ WHAT WE OFFER — CORE FOCUS AREAS

Where TeamBees creates the most value across the ServiceNow lifecycle

01

PLATFORM MODERNIZATION

Stabilizing over-customized environments, reducing technical debt and preparing ServiceNow for scalable growth.

02

ENTERPRISE WORKFLOW DOMAINS

ITSM, ITOM, ITAM, CSM and HRSD delivered OOTB-first, extended only where customization earns its place.

03

UPGRADE & RELEASE ENGINEERING

Repeatable upgrade frameworks that remove risk and make every release predictable.

04

INTEGRATION & GOVERNANCE

Enterprise integrations and CSDM-aligned data model governance across the whole estate.

05

AI-READY SERVICENOW FOUNDATIONS

Structured workflows, governed data and automation-ready architecture create a stronger foundation for AI adoption.

06

ENTERPRISE PLATFORM OPERATIONS

Proactive instance management, reliability engineering and continuous optimization — AMS, 24/7.

HOW WE DELIVER • Certified talent, day one • OOTB-first architecture • CSDM at the core • 24/7 global delivery

■ AI IN SERVICENOW — AND WHY IT MATTERS

From workflow automation to agentic AI, with Otto at the front

Value comes from governed data and disciplined adoption, not model hype.

01

SERVICENOW OTTO

Unified AI assistant bringing Now Assist and Moveworks together. People ask in natural language; Otto acts across systems and closes the loop.

02

AI AGENTS & ORCHESTRATION

Task-specific agents built in AI Agent Studio and coordinated by AI Agent Orchestrator to complete work end to end, not just recommend it.

03

PREDICTIVE AIOPS & ANALYTICS

Anomaly detection, incident prediction and root-cause insight that move IT operations from reactive firefighting to prevention.

04

AI CONTROL TOWER

One control plane to discover, govern, secure and measure every AI agent and model running across the enterprise.

HOW IT PAYS OFF

Faster resolution

Deflect L1 volume and cut handling time with self-service and agent assist.

Lower cost to serve

Automate repetitive case, request and change work at enterprise scale.

Better experience

Consistent, 24/7 answers for employees and customers in natural language.

Trust & control

Governed data, auditable agents and human-in-the-loop guardrails.

THE TEAMBEES VIEW AI performs only on clean CSDM data, governed workflows and an OOTB-first architecture. We build that foundation first, then deploy Otto and AI agents against high-volume, well-understood use cases with measurable baselines.

■ **ENGAGEMENT MODELS**

Four ways to work with us, designed around each client's needs

Focused platform improvement and flexible delivery capacity.

01

STAFF AUGMENTATION

ServiceNow architects, consultants, developers and support engineers on a T&M basis — for short and long-term needs.

5–7 DAY RESOURCE TURNAROUND

02

IMPLEMENTATION

Turnkey or modular delivery built on strong ServiceNow DNA — out-of-the-box first, custom applications when needed.

OOTB-FIRST DELIVERY APPROACH

03

CONSULTING

Pilot projects, discovery and fit-gap workshops and impact assessments to plan your transition and maximize the platform.

STRATEGY BEFORE BUILD

04

SUPPORT & AMS

Post-implementation managed support — upgrades, cloning and continuous instance health.

LONG-TERM INSTANCE CARE

ServiceNow-certified resources

CoE & continuous upskilling

Agile, DevOps-driven delivery

Most clients start with one model and add others as the platform matures — the same delivery team stays with you across all four.

■ DELIVERY FRAMEWORK

One disciplined method behind every engagement

Six phases, clear exit criteria and a deliverable you can hold us to.

01

ASSESS

Current-state assessment, value cases and stakeholder alignment.

DELIVERABLE Assessment report & value case

02

ARCHITECT

Process design, CSDM data model and backlog definition.

DELIVERABLE CSDM model & prioritized backlog

03

ENGINEER

Configuration, integrations and iterative agile sprints.

DELIVERABLE Configured workflows & integrations

04

ASSURE

SIT/UAT, data migration checks and security compliance.

DELIVERABLE Test evidence & security sign-off

05

LAUNCH

Training, organizational change management and cutover.

DELIVERABLE Trained users & cutover plan

06

OPTIMIZE

KPI tracking, adoption uplift and continuous improvement.

DELIVERABLE KPI dashboard & improvement roadmap

Every phase ends with something you receive — not a status update.

■ PROVEN SUCCESS STORIES

Measurable outcomes delivered for global enterprises across industries

Global HR & workforce solutions leader

Staffing & talent · Worldwide

HRSD · Employee Center · Case Management

HRSD rollout with optimized case management and a modern Employee Service Center for ~6,000 employees, replacing manual case routing.

45%

faster HR case resolution

90 days

to high platform adoption

Global mining & natural resources major

Mining & resources · Multi-region

ITSM · Integrations · SLA Governance

End-to-end implementation with a custom catalog, reusable workflows and SCCM / LDAP integration for ~4,000 users on siloed service processes.

40%

faster service resolution

50%

more self-service resolution

Global manufacturing & retail group

Manufacturing & retail · Global

CMDB · Discovery · ITOM · APM

CSDM-aligned CMDB with IRE, health dashboards and cloud discovery across 20+ business applications and hybrid datacenters.

35%

better change accuracy

1

trusted source of truth

National rail infrastructure operator

Transport & infrastructure · UK

CSDM · CMDB · Data Standardization

Aligned service data to CSDM best practices and migrated the full service catalog from SharePoint to ServiceNow, replacing years of custom fields.

40%

better CMDB accuracy

70%+

custom fields moved to OOTB

Client references available on request.

■ THE ADVANTAGE

The operating discipline behind every TeamBees engagement

How those outcomes get delivered.

01

FOCUSED SENIOR DELIVERY OVERSIGHT

A named ServiceNow architect owns your engagement end to end — not a rotating bench of unfamiliar resources.

02

FLEXIBLE TEAM MODELS

Move between T&M capacity, fixed-scope projects and managed support without renegotiating the relationship.

03

DELIVERY & QA DISCIPLINE

Agile sprints with weekly demos, documented test evidence and security checks built into every release.

04

CSDM & OOTB GOVERNANCE

We configure to standard, document what we build and transfer knowledge so your team can run it without us.

THE RESULT A platform your team can operate, upgrade and extend — long after we hand it over.

Let's schedule a focused 60-minute working session

Pick whichever is most useful — all three are free of charge.

01

PLATFORM ASSESSMENT

A health check on CMDB/CSDM alignment, customization debt and upgrade readiness — findings are yours to keep.

02

AMS DISCUSSION

Where managed support can stabilize your instance and reduce the cost of running it.

03

TALENT REQUEST

Certified ServiceNow architects, developers and consultants, typically placed within 5–7 days.
