**AI-enabled. Human-verified.
Flexible by design.**

■ ABOUT TEAMBEES

Technology talent and capability delivery, under one roof

2021

Established

50+

TA and domain experts

2 business days

Typical shortlist

4

Markets

We plug into enterprise and GCC technology teams as a capability partner—validated specialists embedded in your workflows, backed by hiring, delivery and workforce-scale expertise.

Manufacturing

Healthcare & Life Sciences

Automotive

BFSI

Technology

Industrial & ER&D

■ TEAMBEEES JOURNEY & GLOBAL PRESENCE

From contingent workforce management to an AI-enabled practice

■ CLIENT PORTFOLIO

Trusted across enterprise technology environments

Key engagements

+ *many more*

ENTERPRISE ENGAGEMENTS • DOMAIN-ALIGNED TALENT • FLEXIBLE WORKFORCE MODELS

■ PARTNERSHIP CREDIBILITY

Why enterprise teams route capability needs through TeamBees

01

SURGE CAPACITY

Scale teams without adding permanent headcount

02

DOMAIN VALIDATION

TA and domain experts verify fit before submission

03

FLEXIBLE PARTNER MODEL

Work within client tools, processes and governance

One partner across talent acquisition, capability build and workforce scale.

■ THE CASE FOR CAPABILITY ON DEMAND

Your roadmap is ready. Your bench may not be.

Three gaps can stall delivery when hiring alone cannot keep pace.

01

THE TIME GAP

Critical roles remain open while delivery timelines continue to move.

02

THE CAPABILITY GAP

AI, cloud, platforms and engineering skills may not exist in-house when needed.

03

THE FLEXIBILITY GAP

Permanent headcount alone cannot match variable or programme-based demand.

TeamBees closes the gaps with validated specialists and flexible engagement models.

■ THE TEAMBEES MODEL

Two capabilities. One accountable partner.

01

TALENT — STAFF AUGMENTATION

Validated professionals embedded directly in your team, tools, ceremonies and reporting lines.

Software • Data & AI • Cloud • QA • Platforms • Mechanical • Electrical • Automation • ServiceNow • Energy trading & CTRM

02

CAPABILITY — MANAGED DELIVERY

Specialist teams and capability pods aligned to defined outcomes, governance, acceptance criteria and transition needs.

Product engineering • Data & AI • Cloud • Quality engineering • GCC build & scale

Use independently or together—one critical role, a specialist team, a capability pod or a GCC ramp-up.

■ WHAT WE DELIVER

Four capability pillars across the technology lifecycle

01

AI & DATA

AI/ML, data engineering, analytics,
RAG and automation

02

AUTOMATION

RPA, workflow automation,
industrial controls and test
automation

03

DIGITAL ENGINEERING

Web, mobile, cloud-native,
enterprise platforms and
modernization

04

PRODUCT ENGINEERING

Mechanical, electrical, embedded,
quality and compliance

Deploy as staff augmentation, capability pods or a hybrid model under consistent governance.

■ WHERE WE APPLY IT

Three engineering sectors. One capability partner.

	SOFTWARE	MECHANICAL	ELECTRICAL & CONTROLS
AI	LLM apps, RAG, MLOps	Predictive maintenance, digital twin	Energy optimisation, fault detection
AUTOMATION	CI/CD, test automation, RPA	PLC/SCADA, robotics, CNC	PLC/HMI, SCADA, BMS, Industrial IoT
DEVELOPMENT	Web, mobile, cloud-native ServiceNow, Endur specialism	CAD/CAE tooling, PLM customisation	Embedded firmware, IoT platforms
ENGINEERING	Architecture, DevOps, SRE	Machine design, FEA/CFD, tooling	Power systems, controls and compliance

One partner, one governance approach—across the capabilities you engineer.

ServiceNow specialism → [slide 13](#) • Endur / CTRM specialism → [slide 14](#)

■ **SECTOR 01 • SOFTWARE ENGINEERING**

Product teams that contribute from week one

Validated against role requirements, architecture context and delivery expectations.

TOOLCHAIN React • Node • Python • Java • .NET • AWS • Azure • GCP • Kubernetes • Terraform • Playwright • PyTorch

01

Full-Stack Engineers

Web and service layers across modern stacks

02

Cloud & DevOps

Cloud platforms, Kubernetes, Terraform and CI/CD

03

AI / ML Engineers

LLMs, RAG, model training, MLOps and evaluation

04

QA & Test Automation

UI, API, performance and automated testing

Product Development

Platform & SRE

AI Enablement

Modernisation

■ SECTOR 02 • MECHANICAL ENGINEERING

Design and production capacity, on demand

Engineering every stage of the mechanical product lifecycle.

TOOLCHAIN SolidWorks • CATIA • Creo • Siemens NX • Inventor • ANSYS • Abaqus • MATLAB/Simulink • Teamcenter

01

Design Engineers

3D modelling, assemblies, GD&T
and production drawings

02

CAE / Simulation

FEA, CFD, thermal and structural
validation

03

Manufacturing Engineers

Tooling, fixturing, DFM/DFA and
process planning

04

Automation & Robotics

PLC integration, cell layout and
commissioning support

Product Design

Simulation & Validation

Digital Twin

Process Automation

■ **SECTOR 03 • ELECTRICAL, CONTROLS & AUTOMATION**

From electrical design to intelligent automation

Specialists aligned to client standards, platforms and compliance expectations.

TOOLCHAIN EPLAN • AutoCAD Electrical • ETAP • TIA Portal • Studio 5000 • Codesys • Altium • KiCad • Ignition

01

Electrical Design

Schematics, panels, cable
schedules and load analysis

02

Controls & PLC

Siemens, Rockwell, Schneider, HMI
and SCADA

03

Embedded Systems

Firmware, RTOS, drivers and board
validation

04

Power Systems

Distribution, protection
coordination and harmonics

Panel & Control Design

Industrial Automation

Embedded & IoT

Energy & Compliance

Validated ServiceNow talent, embedded in your platform team

ServiceNow architects, consultants, developers and support engineers on a T&M basis — for short and long-term needs.

ROLES WE PLACE

- **ServiceNow architects** — platform design, CSDM-aligned data model and governance
- **Functional consultants** — fit-gap workshops, process design, ITIL-aligned workflows and UAT
- **ServiceNow developers** — Business Rules, Script Includes, Client Scripts, Glide APIs and Flow Designer
- **Integration engineers** — REST/SOAP, MID Server, IntegrationHub, OAuth 2.0 and mTLS
- **Portal & workspace developers** — Service Portal, UI Builder and Service Operations Workspace
- **CMDB & asset specialists** — CMDB, CSDM, Discovery and hardware asset management
- **Platform & support engineers** — upgrades, Update Sets and CI/CD, ATF, L2/L3 production support

MODULES WE STAFF

ITSM
IT Service
Management

ITOM
IT Operations
Management

CSM
Customer Service
Mgmt.

HRSD
HR Service Delivery

ITAM
IT Asset Management

IRM
Integrated Risk Mgmt.

SecOps
Security Operations

ESG
Environmental, Social
& Gov.

PLATFORM SKILLS OUR SPECIALISTS BRING

- ✓ **Development** — JavaScript, Glide APIs, Flow Designer, Import Sets & Transform Maps
- ✓ **Experience & quality** — Service Portal, UI Builder, ATF, Performance Analytics, ACLs
- ✓ **Certifications on the bench** — CSA, CAD, CIS – Data Foundations, CIS – HAM, ITIL 4

STAFF AUGMENTATION • Architects, consultants, developers and support engineers on T&M • Define → Match → Embed → Scale

Specialist CTRM talent, embedded in your trading technology team

Resource augmentation for Endur / Findur, Aspect, Allegro and RightAngle programmes — front, middle and back office.

ROLES WE PLACE

- **Techno-functional consultants** — front, middle and back office specialists who can talk to a trader and read the code
- **Technical consultants & developers** — Java, C#/.NET, PL/SQL, T-SQL, Python and platform-native scripting
- **Business analysts** — requirements, fit-gap, process design and UAT ownership
- **Integration & data migration engineers** — interface build, ETL, reconciliation and cutover
- **Trade support analysts** — L2/L3 cover across trading hours, month-end and close
- **Test engineers & automation specialists** — regression, upgrade and migration assurance
- **Solution architects & delivery leads** — programme shape, estimates and governance

FUNCTIONS WE STAFF

FO
Front Office

MO
Middle Office & Risk

BO
Back Office

LOG
Scheduling & Logistics

DATA
Market & Reference
Data

INT
Integration &
Migration

REG
Regulatory &
Accounting

QA
Test & Release
Assurance

PLATFORMS OUR SPECIALISTS WORK ON

- ✓ **Endur / Findur** — trading, operations and finance — OpenComponents, AVS/JVS scripting, Connex, TPM workflows
- ✓ **Aspect, Allegro & RightAngle** — configuration, interface and support work across power, gas and refined products
- ✓ **Adjacent systems** — Trayport, exchange and broker connectivity, treasury and ERP

STAFF AUGMENTATION • Techno-functional consultants, developers, analysts and support engineers on T&M • Define → Match → Embed → Scale

■ HOW WE ENGAGE

Four team shapes. Three ways to hire. One onboarding path.

CHOOSE THE TEAM SHAPE — START WITH ONE ROLE, SCALE WHEN READY

01

DEDICATED SPECIALIST

One validated professional embedded in your team and operating rhythm

02

SPECIALIST SQUAD

A multi-role team for a defined programme, directed by you

03

CAPABILITY POD

A managed team with a named delivery lead, governance and continuity

04

GCC BUILD

Build and run your India capability centre, then transfer it to you

HIRE ON ANY SHAPE

CONTRACT • CONTRACT-TO-HIRE • PERMANENT

ONE ONBOARDING PATH

01 • DEFINE

Role, stack and success measures

02 • MATCH

Validated shortlist

03 • EMBED

Access, onboarding and reporting

04 • SCALE

Ramp, transition or rebalance

■ HOW WE PROTECT QUALITY

Five gates before a specialist reaches you

1

PROFILE SCREEN

Credentials, tenure and relevance

2

STRUCTURED ASSESSMENT

Skills and experience aligned to the role

3

DOMAIN VALIDATION

Review by TA and domain experts

4

COMMUNICATION REVIEW

Client readiness and collaboration

5

CHECKS & READINESS

References, onboarding and compliance

Result: a concise, validated shortlist—not a volume of unqualified profiles.

■ GOVERNANCE & COMPLIANCE

Enterprise controls across every engagement

01

CONTRACT & EMPLOYMENT

SOWs, NDAs, change control and country-specific employment compliance

02

DATA & ACCESS

Client-aligned access, device and information-security requirements

03

IP & CONFIDENTIALITY

Clear obligations aligned to client contracts and policies

04

DELIVERY GOVERNANCE

Named ownership, status rhythm and escalation path

REPORTING RHYTHM • Client ceremonies • Status reviews • Escalation governance • Transition support

■ HOW YOUR ENGAGEMENT RUNS

A capability pod built around your work

WHY THE POD MODEL WORKS

- ✓ One accountable owner
- ✓ Specialists, not generalists
- ✓ Senior access when decisions matter
- ✓ Governance aligned to your delivery rhythm

■ WHY CHOOSE TEAMBEES

The scale and flexibility enterprise teams need

THE CAPABILITY YOU EXPECT

- ✓ Enterprise & GCC focus
- ✓ AI-enabled, human-verified selection
- ✓ Technology and engineering breadth
- ✓ Flexible engagement models

THE BENEFITS YOU GET

- ⚡ Faster validated shortlists
- ⚡ Direct access to domain expertise
- ⚡ Ability to start with one role and scale
- ⚡ Continuity, governance and transition support

Build capability without slowing the roadmap.

Let's build your capability engine.

Start with a Role & Capability Calibration Session
